EXPERIENCE

Hyatt Hotels Corporation, Chicago, Illinois

Lead Full Stack Developer

08/20 - 05/24

Led the development and deployment of over 1,600 micro-sites and web applications, leveraging React and NextJS for frontend development, utilizing my knowledge of Hooks and React Router. Heavily utilized TypeScript for these applications, taking advantage of its strongly-typed nature and ES6+ features. Implemented GraphQL for efficient data handling and Apollo Client for a robust state management solution. Emphasized budgeting and risk management throughout the development process.

Microsoft, Chicago, Illinois

Senior Software Developer

03/20 - 08/21

For microsoft.com Adobe Experience Manager store, led several key projects. Configured AEM Sling Dynamic Includes, developed React components such as "Buy Box", Product Detail Page, Product Category Pages and conducted load testing with Gatling. COVID-19 Illinois Economic Stability Initiative.

Hyatt Hotels Corporation, Chicago, Illinois**Senior Frontend Developer****05/17 - 05/20**

Built over 1,600 AngularJS sites initially utilizing Adobe Experience Manager and a SpringBoot API layer, which was later transitioned into React and React Native components, constructed on NextJS using GraphQL. Responsible for overseeing in-progress builds conforming to approved designs.

Valtech, Chicago, Illinois**Senior Software Developer****11/16 - 05/17**

Led as forefront developer for various Adobe Experience Manager (AEM)-based projects for clients including Hyatt, Rolex and Lundbeck.

Blitsy (Chicago Ventures), Chicago, Illinois**Senior Software Developer****01/15 - 08/16**

Served as a technical lead to a team of 6-10 developers, employing an Agile methodology with bi-weekly sprints. Facilitated coaching sessions, computer science challenges, and regular code reviews to boost team engagement and productivity. Administered AWS compute services such as EC2, ECS, and Lambda to maintain dynamically deployed, scalable containers, demonstrating proficiency in cloud-based DevOps practices. Leveraged Jenkins to establish a continuous integration environment, reinforcing an effective CI/CD pipeline aligning with organizational goals. Performed a significant overhaul of a LAMP-based Magento middleware, simplifying its architecture to facilitate component-level modifications by junior developers, demonstrating experience in full-stack development and team mentoring. Implemented a machine learning algorithm to prioritize search results, displaying competence in AI/ML application development. Developed an iOS e-commerce application using Objective-C, incorporating a native custom checkout experience by extending and optimizing Magento REST API, further showcasing skills in mobile app development and API management.

Agora, Chicago, IL**05/05 - Current**
